Babies

Young children are fascinated by babies, what babies can do, and how they can help care for babies.

During the Babies project, children explore how babies grow and the different ways they are cared for around the world. Children use baby dolls to practice feeding, bathing, and caring for babies.

Family members can donate gently used baby items, visit the classroom with a baby, take part in a Book Sharing event to view a Baby Care book that children create, and talk with children about what they were like as babies.

Babies and their caregivers are invited to visit the classroom to help children connect with real babies.
